SUBJECT INDEX

Achiral
Materials science of organic compounds. Part 2. Thermal studies of acentric (second-harmonic-generative) and centrosymmetric crystals of achiral straight-chain *para*-nitrophenylcarbamyl compounds 311
Activation energy
Frequency–temperature relationships for relaxations in polymers 1
Thermal dynamic relaxation and enthalpy distribution of an aromatic polyimide film: 6FDA-PFMB 15
Adiabatic
Reliable scale-up of thermal hazards data using the PHI-TEC II calorimeter 211
Adsorption
Selective molecular sorption by high surface area catalyst supports 333
Aerosol
Thermophoretic deposition of airborne particles in an annular flow: experiments and simulations 239
Ageing
Thermally-stimulated creep spectroscopy in the study of physicochemical ageing of LDPE 51
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
Allotrope
The thermal properties of four allotropes of carbon 169
Atmosphere
The thermal analysis of bismaleimide/graphite fiber composite by TG/FTIR 115
Thermal characterization of sulfonated polyethylene fibers 123
Thermal decomposition of cotton cellulose treated with selected salts 257
Automatic transmission fluid
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363

Bilayer
DSC and TSC studies of polyurethane mono- and bilayer paints 43
Blend
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33

Calcium sulphonate
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363
Calibration
The reliable measurement of DSC onset points by internal referencing. Part 1 249
The contribution of precise temperature measurement and control to thermal analysis 343
Calorimeter
Compressed-gas-induced plasticization of polymers 177
Reliable scale-up of thermal hazards data using the PHI-TEC II calorimeter 211
Calorimetry
The isothermal relaxation of the glassy state of 60% w/w ethylene glycol in water: a possible nucleation process below the glass transition 27
Application of isothermal calorimetry and UV spectroscopy for stability monitoring of pentaerythritol tetranitrate 187
Carbon
The thermal properties of four allotropes of carbon 169
Carbonate
High temperature reactions of metal carbonates with a model metal surface 353
Catalyst
Thermogravimetry of filter-borne gasoline engine-out particulates 221
Catalyst support
Selective molecular sorption by high surface area catalyst supports 333
Cellulose
Thermal decomposition of cotton cellulose treated with selected salts 257
Composite
The thermal analysis of bismaleimide/graphite fiber composite by TG/FTIR 115

Copolymer
DSC and TSC study of a VDF/TrFE copolymer 65
Structure and properties of ultralow density polyethylenes 85
Cotton
Thermal decomposition of cotton cellulose treated with selected salts 257
Creep
Structure and properties of ultralow density polyethylenes 85
The dynamic mechanical analysis of hydrogel elastomers 107
Cross link
A study of the curing process of paint on metal utilizing thermal stimulated current (TSC) and relaxation map analysis (RMA) 133
Crystal
Materials science of organic compounds. Part 2. Thermal studies of acentric (second-harmonic-generative) and centrosymmetric crystals of achiral straight-chain *para*-nitrophenylcarbamyl compounds 311
Crystallinity
Dielectric relaxation phenomena in PEEK 7
Thermally-stimulated creep spectroscopy in the study of physicochemical ageing of LDPE 51
DSC and TSC study of a VDF/TrFE copolymer 65
Structure and properties of ultralow density polyethylenes 85
Compressed-gas-induced plasticization of polymers 177
Evaluation of doped polyethylene oxide as solid electrolyte 281
Crystallization
The isothermal relaxation of the glassy state of 60% w/w ethylene glycol in water: a possible nucleation process below the glass transition 27
Materials science of organic compounds. Part 3. Glass-formers, vitriphores, T_g, and molecular chirality 317
The effect of the functional groups of organic solutes on the suppression of crystallization in aqueous solutions 325
Curie transition
DSC and TSC study of a VDF/TrFE copolymer 65
Curing
A study of the curing process of paint on metal utilizing thermal stimulated current (TSC) and relaxation map analysis (RMA) 133
Decomposition
Thermal decomposition of cotton cellulose treated with selected salts 257
Spectroscopic investigation of the thermal decomposition of europium oxalate 301
Denaturation
Protein characterization by DSC 275
Desorption
Selective molecular sorption by high surface area catalyst supports 333
Diamond
The thermal properties of four allotropes of carbon 169
DIERS
Defining the consequences of exothermic behavior in large-scale equipment utilizing DIERS technology 229
DMA
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
Structure and properties of ultralow density polyethylenes 85
The dynamic mechanical analysis of hydrogel elastomers 107
DMTA
A DMTA study of the fuel resistance of elastomers 143
Doping
Evaluation of doped polyethylene oxide as solid electrolyte 281
DSC
Dielectric relaxation phenomena in PEEK 7
DSC and TSC studies of polyurethane mono- and bilayer paints 43
DSC and TSC study of a VDF/TrFE copolymer 65
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
Structure and properties of ultralow density polyethylenes 85
Thermal characterization of sulfonated polyethylene fibers 123
Single-run heat capacity measurement by DSC: principle, experimental and data analysis 155
DSC studies of new energy storage materials. Part 2. New materials and bulk studies 163
Factors affecting oxidation properties in differential scanning calorimetric studies 201
The reliable measurement of DSC onset points by internal referencing. Part 1 249
Characterization of peanuts by DSC for country of origin 265
Protein characterization by DSC 275

Evaluation of doped polyethylene oxide as solid electrolyte 281
Materials science of organic compounds. Part 2. Thermal studies of acentric (second-harmonic-generative) and centrosymmetric crystals of achiral straight-chain *para*-nitrophenylcarbamyl compounds 311
Materials science of organic compounds. Part 3. Glass-formers, vitriphores, T_g, and molecular chirality 317
The effect of the functional groups of organic solutes on the suppression of crystallization in aqueous solutions 325

DTA
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
Spectroscopic investigation of the thermal decomposition of europium oxalate 301
The contribution of precise temperature measurement and control to thermal analysis 343

DTG
Thermal decomposition of cotton cellulose treated with selected salts 257

Elastomer
The dynamic mechanical analysis of hydrogel elastomers 107
A DMTA study of the fuel resistance of elastomers 143

EPA UDDS
Thermogravimetry of filter-borne gasoline engine-out particulates 221

EPDM
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77

Epoxy
Thermal behavior of epoxy resins 99

EPR
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33

Equipment
The dynamic mechanical analysis of hydrogel elastomers 107

ESM
DSC studies of new energy storage materials. Part 2. New materials and bulk studies 163

Europium
Spectroscopic investigation of the thermal decomposition of europium oxalate 301

EVA
Structure and properties of ultralow density polyethylenes 85

Exothermic
Defining the consequences of exothermic behavior in large-scale equipment utilizing DIERS technology 229

FDA
Thermal dynamic relaxation and enthalpy distribution of an aromatic polyimide film: 6FDA-PFMB 15

Ferrite
High temperature reactions of metal carbonates with a model metal surface 353

Fibre
Thermal characterization of sulfonated polyethylene fibers 123

FTIR
The thermal analysis of bismaleimide/graphite fiber composite by TG/FTIR 115
Thermal decomposition of cotton cellulose treated with selected salts 257
Evaluation of doped polyethylene oxide as solid electrolyte 281

Fuel
A DMTA study of the fuel resistance of elastomers 143

Fullerene
The thermal properties of four allotropes of carbon 169

Furnace
The contribution of precise temperature measurement and control to thermal analysis 343

Glass
Materials science of organic compounds. Part 3. Glass-formers, vitriphores, T_g, and molecular chirality 317

Glass transition
Dielectric relaxation phenomena in PEEK 7
The isothermal relaxation of the glassy state of 60% w/w ethylene glycol in water: a possible nucleation process below the glass transition 27
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33
DSC and TSC study of a VDF/TrFE copolymer 65
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
Thermal behavior of epoxy resins 99
A DMTA study of the fuel resistance of elastomers 143
Compressed-gas-induced plasticization of polymers 177
Materials science of organic compounds.

Part 3. Glass-formers, vitriphores, T_g, and molecular chirality 317
Graphite
The thermal properties of four allotropes of carbon 169

Hardness
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
A DMTA study of the fuel resistance of elastomers 143
Heat capacity
Thermal behavior of epoxy resins 99
Single-run heat capacity measurement by DSC: principle, experimental and data analysis 155
Heat of fusion
Materials science of organic compounds. Part 2. Thermal studies of acentric (second-harmonic-generative) and centrosymmetric crystals of achiral straight-chain *para*-nitrophenylcarbamyl compounds 311
Heat storage
DSC studies of new energy storage materials. Part 2. New materials and bulk studies 163
Homochiral compound
Materials science of organic compounds. Part 3. Glass-formers, vitriphores, T_g, and molecular chirality 317
HPLC
Characterization of peanuts by DSC for country of origin 265
Hydrogel
The dynamic mechanical analysis of hydrogel elastomers 107
Hydrogen bond
The effect of the functional groups of organic solutes on the suppression of crystallization in aqueous solutions 325

Isomer
Materials science of organic compounds. Part 3. Glass-formers, vitriphores, T_g, and molecular chirality 317
Isothermal
The isothermal relaxation of the glassy state of 60% w/w ethylene glycol in water: a possible nucleation process below the glass transition 27
The dynamic mechanical analysis of hydrogel elastomers 107
Application of isothermal calorimetry and UV spectroscopy for stability monitoring of pentaerythritol tetranitrate 187

Lanthanon
Spectroscopic investigation of the thermal decomposition of europium oxalate 301
LDPE
Thermally-stimulated creep spectroscopy in the study of physicochemical ageing of LDPE 51
Luminescence
Spectroscopic investigation of the thermal decomposition of europium oxalate 301

Melting transition
Thermal behavior of epoxy resins 99
Model
Dielectric relaxation phenomena in PEEK 7
Application of isothermal calorimetry and UV spectroscopy for stability monitoring of pentaerythritol tetranitrate 187
Thermophoretic deposition of airborne particles in an annular flow: experiments and simulations 239
Molecular sorption
Selective molecular sorption by high surface area catalyst supports 333
Monolayer
DSC and TSC studies of polyurethane mono- and bilayer paints 43

Nitrogen oxide
Application of isothermal calorimetry and UV spectroscopy for stability monitoring of pentaerythritol tetranitrate 187
Non-isothermal
The dynamic mechanical analysis of hydrogel elastomers 107
Novel
The dynamic mechanical analysis of hydrogel elastomers 107
DSC studies of new energy storage materials. Part 2. New materials and bulk studies 163
Defining the consequences of exothermic behavior in large-scale equipment utilizing DIERS technology 229
Nucleation
The isothermal relaxation of the glassy state of 60% w/w ethylene glycol in water: a possible nucleation process below the glass transition 27
Nylon
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363

Oil
Factors affecting oxidation properties in differential scanning calorimetric studies 201

Thermogravimetry of filter-borne gasoline engine-out particulates 221
Characterization of peanuts by DSC for country of origin 265
OIT
Factors affecting oxidation properties in differential scanning calorimetric studies 201
Optics
Materials science of organic compounds. Part 2. Thermal studies of acentric (second-harmonic-generative) and centrosymmetric crystals of achiral straight-chain *para*-nitrophenylcarbamyl compounds 311
Oxalate
Spectroscopic investigation of the thermal decomposition of europium oxalate 301
Oxidation
Factors affecting oxidation properties in differential scanning calorimetric studies 201
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363

Paint
A study of the curing process of paint on metal utilizing thermal stimulated current (TSC) and relaxation map analysis (RMA) 133
Particulates
Thermogravimetry of filter-borne gasoline engine-out particulates 221
PDSC
Factors affecting oxidation properties in differential scanning calorimetric studies 201
Peanut
Characterization of peanuts by DSC for country of origin 265
PEEK
Dielectric relaxation phenomena in PEEK 7
Compressed-gas-induced plasticization of polymers 177
PEO
Evaluation of doped polyethylene oxide as solid electrolyte 281
PETN
Application of isothermal calorimetry and UV spectroscopy for stability monitoring of pentaerythritol tetranitrate 187
Petroleum
Thermogravimetry of filter-borne gasoline engine-out particulates 221
PFMB
Thermal dynamic relaxation and enthalpy distribution of an aromatic polyimide film: 6FDA-PFMB 15
pH
Protein characterization by DSC 275
PHI-TEC II
Reliable scale-up of thermal hazards data using the PHI-TEC II calorimeter 211
Plasticization
Thermally-stimulated creep spectroscopy in the study of physicochemical ageing of LDPE 51
Compressed-gas-induced plasticization of polymers 177
Pollution
Thermogravimetry of filter-borne gasoline engine-out particulates 221
Polyamide
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33
Polyimide
Thermal dynamic relaxation and enthalpy distribution of an aromatic polyimide film: 6FDA-PFMB 15
Polymer
Frequency–temperature relationships for relaxations in polymers 1
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33
Thermally-stimulated creep spectroscopy in the study of physicochemical ageing of LDPE 51
Structure and properties of ultralow density polyethylenes 85
The thermal analysis of bismaleimide/graphite fiber composite by TG/FTIR 115
A DMTA study of the fuel resistance of elastomers 143
Compressed-gas-induced plasticization of polymers 177
Evaluation of doped polyethylene oxide as solid electrolyte 281
Polyurethane
DSC and TSC studies of polyurethane mono- and bilayer paints 43
Precision
Single-run heat capacity measurement by DSC: principle, experimental and data analysis 155
The contribution of precise temperature measurement and control to thermal analysis 343
Pressure
Defining the consequences of exothermic behavior in large-scale equipment utilizing DIERS technology 229
Program
Single-run heat capacity measurement by DSC: principle, experimental and data analysis 155

Protein
Protein characterization by DSC 275
PTFE
Thermogravimetry of filter-borne gasoline engine-out particulates 221
PVA
The dynamic mechanical analysis of hydrogel elastomers 107

Quality control
Protein characterization by DSC 275

Raman
Spectroscopic investigation of the thermal decomposition of europium oxalate 301
Reference material
The reliable measurement of DSC onset points by internal referencing. Part 1 249
The contribution of precise temperature measurement and control to thermal analysis 343
Relaxation
Frequency–temperature relationships for relaxations in polymers 1
Dielectric relaxation phenomena in PEEK 7
Thermal dynamic relaxation and enthalpy distribution of an aromatic polyimide film: 6FDA-PFMB 15
The isothermal relaxation of the glassy state of 60% w/w ethylene glycol in water: a possible nucleation process below the glass transition 27
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33
DSC and TSC study of a VDF/TrFE copolymer 65
Reproducibility
Characterization of peanuts by DSC for country of origin 265
Resin
Thermal behavior of epoxy resins 99
A study of the curing process of paint on metal utilizing thermal stimulated current (TSC) and relaxation map analysis (RMA) 133
RMA
A study of the curing process of paint on metal utilizing thermal stimulated current (TSC) and relaxation map analysis (RMA) 133
RSST
Defining the consequences of exothermic behavior in large-scale equipment utilizing DIERS technology 229

Safety
Defining the consequences of exothermic behavior in large-scale equipment utilizing DIERS technology 229
Stability
The dynamic mechanical analysis of hydrogel elastomers 107
The thermal analysis of bismaleimide/graphite fiber composite by TG/FTIR 115
Thermal characterization of sulfonated polyethylene fibers 123
Protein characterization by DSC 275
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363
Sulphonation
Thermal characterization of sulfonated polyethylene fibers 123
Surface area
Selective molecular sorption by high surface area catalyst supports 333

TG
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
The thermal analysis of bismaleimide/graphite fiber composite by TG/FTIR 115
Thermal decomposition of cotton cellulose treated with selected salts 257
Evaluation of doped polyethylene oxide as solid electrolyte 281
The contribution of precise temperature measurement and control to thermal analysis 343
TG/DTG
Evaluation of doped polyethylene oxide as solid electrolyte 281
TGA
The thermal analysis of bismaleimide/graphite fiber composite by TG/FTIR 115
Thermal characterization of sulfonated polyethylene fibers 123
Thermogravimetry of filter-borne gasoline engine-out particulates 221
Thermal decomposition of cotton cellulose treated with selected salts 257
Selective molecular sorption by high surface area catalyst supports 333
High temperature reactions of metal carbonates with a model metal surface 353
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363
Thermodynamics
Thermal behavior of epoxy resins 99

Thermophoretic deposition
Thermophoretic deposition of airborne particles in an annular flow: experiments and simulations 239
THOT
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363
TMA
Evaluating the effects of aging on the thermal properties of EPDM roofing materials 77
Automatic transmission fluid compatibility with nylon components by thermomechanical analysis and thermogravimetry 363
TMR
Application of isothermal calorimetry and UV spectroscopy for stability monitoring of pentaerythritol tetranitrate 187
Transition
Thermal behavior of epoxy resins 99
TREF
Structure and properties of ultralow density polyethylenes 85
TSC
Dielectric relaxation phenomena in PEEK 7
DSC and TSC studies of polyurethane mono- and bilayer paints 43
DSC and TSC study of a VDF/TrFE copolymer 65
A study of the curing process of paint on metal utilizing thermal stimulated current (TSC) and relaxation map analysis (RMA) 133
TSCr
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33
Thermally-stimulated creep spectroscopy in the study of physicochemical ageing of LDPE 51

ULDPE
Structure and properties of ultralow density polyethylenes 85
UV
Application of isothermal calorimetry and UV spectroscopy for stability monitoring of pentaerythritol tetranitrate 187

Vitrification
The isothermal relaxation of the glassy state of 60% w/w ethylene glycol in water: a possible nucleation process below the glass transition 27
The effect of the functional groups of organic solutes on the suppression of crystallization in aqueous solutions 325
VSP
Defining the consequences of exothermic behavior in large-scale equipment utilizing DIERS technology 229

Water
Thermally stimulated creep (TSCr) study of polyamide 66 and polyamide 66/EPR blends 33

XRD
High temperature reactions of metal carbonates with a model metal surface 353
